

Play

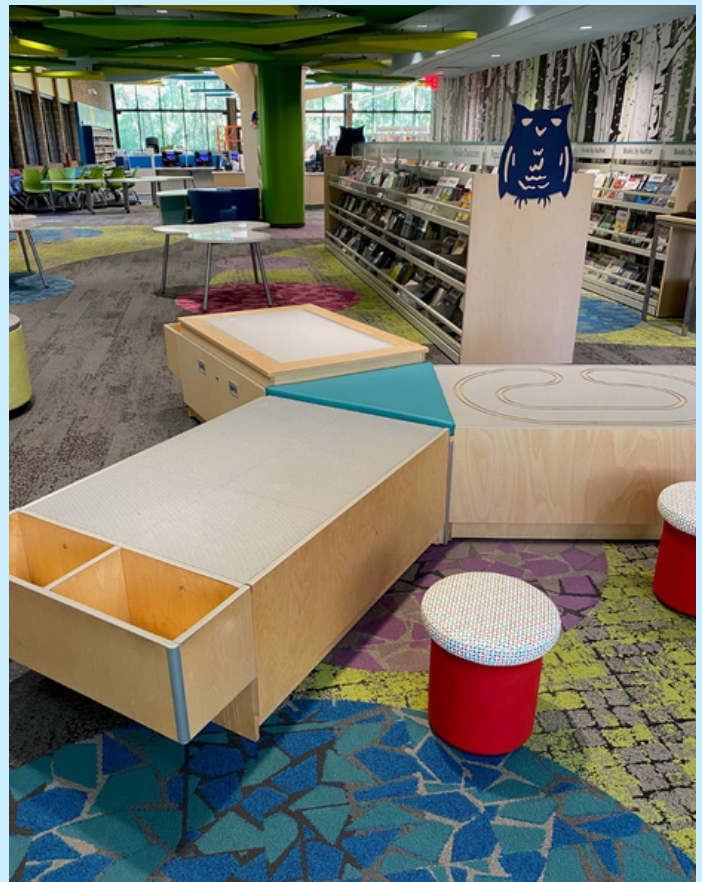

So much happening at the library.

Discovery

Discovery activity tables bring excitement to every space. Select a **single table**, **double table**, or **pinwheel configuration** based on your available space and programming needs.

Tables include open **cubbies for toys**, large **locking drawers** for storage, **reversible surfaces** for multiple activities, **rounded corners**, and **casters for mobility**.

Children's Museum Style Play

We are proud to bring **children's museum-quality interactive play** structures to libraries.

Puppet theatres, playhouses, imaginative kitchens, and baby gardens are just some of the structures that make the library a destination for play.

Hundreds of options

We have options for **any budget, wishlist, or space.**

Activity cubes, velcro walls, imagination walls, and play structures draw young visitors.

Sensory Panels for Play

Sensory panels on rails lock in place and can be removed to add new activities over time.

Install popular sensory panels on shelving end panels, walls, or play structures.
